M3t is a cutting edge software development and kiosk manufacturing company. As a forward thinking organization, we are focused on providing new and innovative casino and slot route solutions. Our success is attributed to robust time-tested products that are used in many properties across the United States.

A09014™
CASINO ALL-IN-ONE KIOSK
TICKET REDEMPTION / ATM / BILL BREAKING
PLAYER'S CLUB FEATURES / JACKPOT PROCESSING

PROMOTIONAL GAMES

The full color 22" HD touchscreen sets the AO9014 apart from the competition. The size and quality of this screen allows patrons to engage in promotional games and other unique features encouraging customers to enroll in the player's club with a chance to win special prizes or promotional items.

COIN HOPPERS (COMMERICAL CAPACITY)

The base model for the AO9014™ includes some of the largest capacity Crane coin hoppers available in the market.

ATM / CASH ADVANCE

The ATM / Cash Advance functionality provides convenience and functionality to the traditional ticket redemption unit, driving more cash and game play to the gaming floor.

MAXIMUM BILL DISPENSING CAPACITY

With up to 5 – 3,000 bill capacity cartridges in its Fujitsu bill dispenser, the AO9014™ provides the flexibility and capacity to accommodate the largest casino properties.

AO9014™

DIMENSIONS AND FEATURES

PLAYER'S CLUB ENROLLMENT WITH CARD PRINTING & ENCODING

Using the large capacity Evolis card printer (500 card hopper), the player's club enrollment with card printing option provides a unique platform for enrolling a patron in the player's club and delivering a player's club card directly at the kiosk, saving tons of time for personnel. This feature provides the casino a method to scan and verify a license is valid at the kiosk as well.

TICKET PRINTING

Printing tickets at the kiosk allows the casino to save time and effort on filling coin hoppers, as well as drive additional play on the casino floor with promotional vouchers.

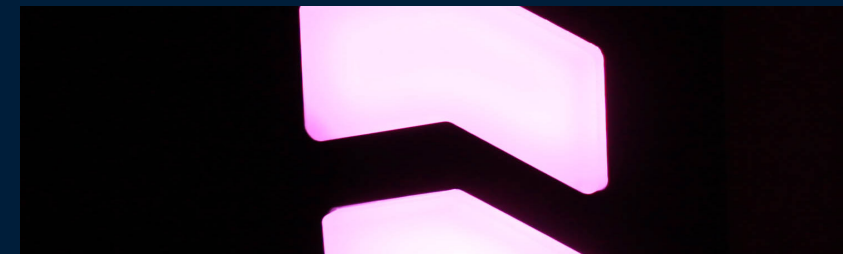

BAR CODE OR QR CODE SCANNING

The AO9014 has the unique ability to scan 2D, 3D and 4D bar codes or QR codes, allowing the casino to send out promotions via mail, e-mail or text message encouraging their customers to stop by and register to win a promotional item at the kiosk.

EXTRA LARGE CAPACITY BILL ACCEPTORS

The AO9014 will stack up to 1,200 notes each in its two premium MEI bill acceptors. These can be upgraded to the 2,200 note bill acceptors as well.

LED ATTRACTANT LIGHTS

The AO9014™ comes standard with LED attractant lights. These low heat LED's are designed to provide maximum visibility for redemption kiosk users. This feature makes the AO9014™ visually appealing to guests, especially in dark or dimly lit areas.
