Player's Club Enrollment With Card Printing

The PC7015™ is the first of its kind, allowing players to enroll in the player's club directly from a kiosk and receive their player's club card at the same time. This tool will greatly improve guest satisfaction and drastically reduce lines at the player's club window. The industrial grade card printer in this unit is designed to hold up to 500 cards, making service a breeze.

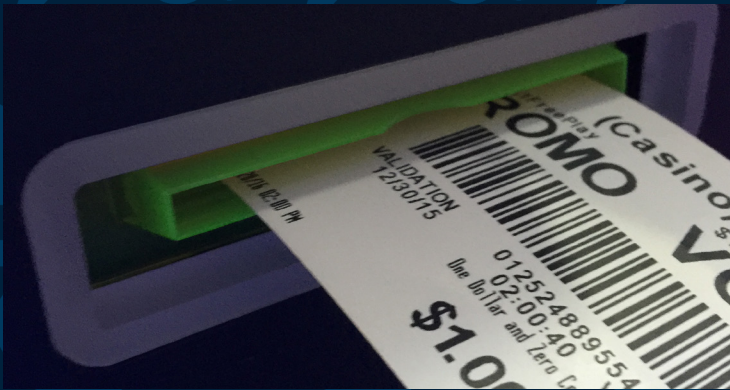

Driver's License Scanning and Verification

A core feature of this unit is the ability to scan a patron's driver's license and validate its markings and information. The PC7015™ includes an automated scanning solution that verifies an individual's information against a national database. This level of service will definitely improve your security and compliance measures required by FinCEN.

Promotional Games

The PC7015™ provides a full suite of promotional games. These games will definitely incentivize your customer to get more engaged in the player's club.

TITO Ticket and Event Ticket Printing

As you contemplate how best to reward the customer for his or her play, keep in mind the PC7015™ provides great flexibility in printing promotion voucher tickets, free play tickets and event tickets. This feature should greatly expand your ability to keep the guest engaged in all aspects of your property.

LED Attractant Lighting

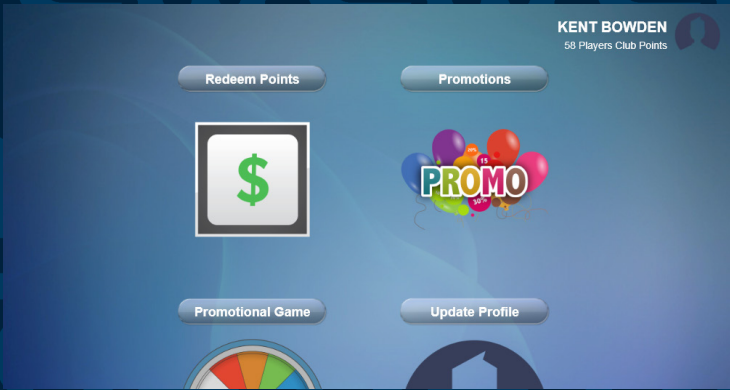

Lighting on the PC7015™ establishes this unit as an exciting and engaging place to conduct player's club transactions. This unit has individually controlled low heat LED's. By controlling them individually, you can now create a custom light show to reflect any holiday or promotional event underway.

PC7015™
Dimensions and Features

Power Conditioning

We have included the Powervar power conditioner and battery backup in our standard build. This unit is designed to bring the unit back up in the event of a power failure and provide a level of data and interaction for the customer unsurpassed in the industry. We have also added line conditioners to the bulkhead to protect the unit from any electrical charge over the communication lines.

Additional Software Features

Guests will have the flexibility to create their player's club account, modify their account information, check point balance levels, view and enroll in current promotions. Guests will also be able to redeem points for promotional items that can be shipped directly from a fulfillment company or stocked on site.

22" HD Color Touch Screen

The full color 22" HD ELO touch screen sets the PC7015™ apart from the competition. The size and quality of this screen allows for easy customer interface as well as split screen functionality for marketing and advertising.
