UC1100™

Under-the-Counter Kiosk

Ticket Redemption / Bill Breaking

m3t
m3ts.com

Security

The UC1100 is one of the highest security safes on the market. Constructed with 12ga steel the unit is designed to provide ultimate security for the cash inside.

10" HD Color Touch Screen

The full color 10" HD ELO touch screen makes the UC1100 versatile and easy to use. This screen is designed to tilt out for easy access without bending down.

Coin Hoppers

Dispensing coin is essential when redeeming TITO tickets and as such the UC1100 is equipped with 3 commercial capacity coin hoppers.

Large Bill Acceptor Capacity

The UC1100 comes standard with a 1,200 note bill acceptor to provide great flexibility to soft count teams and cashiers.

Huge Capacity Bill Dispensing

The first M3t unit to support three bill dispensing options. The standard model will come with a Fujitsu F400 dispenser (2,200 notes per cassette / up to 4 cassettes). Upgrades for this unit include the Fujitsu F510 dispenser (3,000 notes per cassette / up to 5 cassettes) or the Glory 500 (3,000 notes per cassette / up to 5 cassettes)

Power Conditioning

The Powervar power conditioner and battery backup is sold with the UC1100 for the ultimate in power conditioning and battery backup. This device is not included inside the cabinet but will be placed near the unit. This component is designed to bring the unit back up in the event of a power failure and provide a level of data and interaction for the customer unsurpassed in the industry.

Jackpot Processing

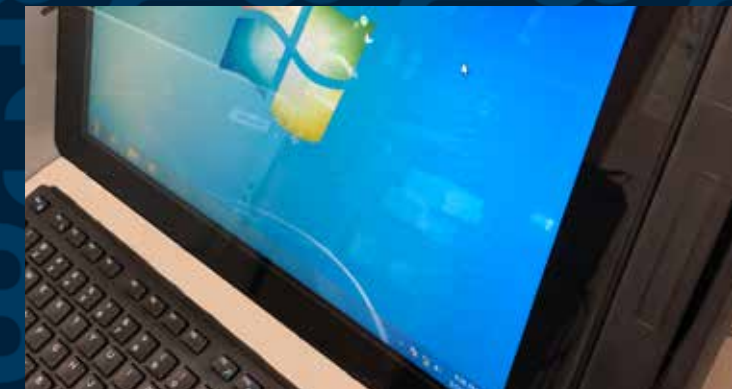

Processing jackpots is a key feature of the UC1100. Cashiers are given the flexibility of scanning jackpot vouchers via a bar code scanner on the front door. This will better secure the large amount of funds required to pay out jackpots.

UC1100™ Dimensions and Features

Solid State Drive in PC

The UC1100 comes standard with a solid state drive in the PC. This allows for quicker response to attendants, improved data security, longer life cycle, greater reliability and lower heat output.

Integrated Cashier Terminal

Cashiers will provide a seamless integration to the M3t cashier module for conducting transactions. This integration will make their effort as smooth as possible.
